

# Function printer

Bruce E. Kendall

4/17/2019

Function setup:

```
myfunc <- function(x, y) {  
  # Here's a function with a comment and custom spacing in the source code  
  switch(x,  
    one = 1,  
    two = if (y) {  
      3  
    } else {  
      2  
    }  
  )  
}
```

Print using print

```
print(myfunc)
```

```
## function(x, y) {  
##   # Here's a function with a comment and custom spacing in the source code  
##   switch(x,  
##     one = 1,  
##     two = if (y) {  
##       3  
##     } else {  
##       2  
##     }  
##   )  
## }
```

Print using print.function

```
print.function(myfunc)
```

```
## function(x, y) {  
##   # Here's a function with a comment and custom spacing in the source code  
##   switch(x,  
##     one = 1,  
##     two = if (y) {  
##       3  
##     } else {  
##       2  
##     }  
##   )  
## }
```
